### OBJECTIVE

I am an enthusiastic and driven Full Stack Developer with a strong foundation in the MERN stack, looking to apply my technical skills and project experience to contribute to innovative software solutions. I aim to learn, grow, and create impactful web applications with an emphasis on responsive design, clean code, and user experience.

---

### EDUCATION

- **Bachelor of Computer Applications (BCA) : 2023**  
Gulbarga University
- **MERN Stack Course : 2024**  
DevTown | <https://www.cert.devtown.in/verify/NUJOFUrGlg>
- **JavaScript (Basic to Advanced) : 2024**  
LearnVern Pvt. Ltd | <https://github.com/manojLovesCoding/JS.git>

---

### TECHNICAL SKILLS

- Frontend Technologies: React, TailwindCSS, Axios, Toastify, React Router, Firebase, Clerk
- Backend Technologies: Node.js, Express, MongoDB, Mongoose, JWT, CORS, Multer
- APIs & Libraries: Clipdrop API (AI-powered background removal), TMDB API, Razorpay
- Version Control: Git, GitHub
- Tools: HTTPie, Thunder-Client, Nodemon, dotenv
- Deployment : Vercel , Hostinger

---

### Latest Projects

#### 1) **Full-Stack AI SaaS Application**

A full-stack AI-powered background removal app built using the MERN stack. Users can upload images, remove backgrounds via the Clipdrop API, and download images with a transparent background.

##### **Key Features:**

**Credit System:** Users get 5 free credits to remove backgrounds, with the ability to purchase more credits using Razorpay.

**User Authentication:** Integrated **Clerk** for seamless login, registration, and profile management.

**Tech Stack:** React, TailwindCSS, Clerk, Node.js, Express, MongoDB, Razorpay, Clipdrop API

**Link:** <https://github.com/manojLovesCoding/bg-removal.git>

**Live :** <https://bg-removal-three-xi.vercel.app/>

---

#### 2) **Contact Manager Backend Application**

A backend contact management system using MongoDB, Express, and Node.js, enabling users to manage their contacts securely.

##### **Key Features:**

**User Authentication:** Registration, login, and secure access using JWT.

**CRUD Operations:** Allows users to create, read, update, and delete their own contacts.

**Tech Stack:** MongoDB, Express.js, Node.js, bcrypt, JWT, Nodemon

**Link:** <https://github.com/manojLovesCoding/mycontacts-backend.git>

### 3) Netflix Clone

A Netflix clone application allowing users to browse movies, create an account, and view movie details.

**Key Features:**

**Movie Data Integration:** Integrated TMDB API for movie details, posters, and more.

**User Authentication:** Firebase Authentication for a personalized experience.

**Tech Stack:** React, Firebase, TMDB API, React-Toastify

**Link:** <https://github.com/manojLovesCoding/Netflix-Clone.git>

---

### 4) Online Appointment Booking Website

A responsive online appointment booking system for doctors and hospitals built with ReactJS and TailwindCSS.

**Key Features:**

**Multiple Doctors:** Browse and filter doctors based on specialty.

**Appointment Booking:** Select a date and time slot within a 7-day window.

**Responsive Design:** Built with TailwindCSS, ensuring a smooth experience across all devices.

**Deployed on Vercel:** Live deployment for seamless hosting and performance.

**Link:** <https://github.com/manojLovesCoding/Hospital-app.git>

**Live :** <https://hospital-app-eight.vercel.app/>

---

### 5) Real Estate Website

A responsive real estate website built with ReactJS and TailwindCSS, complete with smooth animations and an integrated contact form.

**Key Features:**

**Responsive Design:** Optimized for all devices using ReactJS and TailwindCSS.

**Smooth Animations:** Integrated Framer Motion for enhanced user experience.

**Contact Form:** Fully functional contact form using Web3Form API to send inquiries directly to the admin's email.

**Link:** <https://github.com/manojLovesCoding/Real-Estate-App.git>

**Live :** <https://real-estate-app-six-tawny.vercel.app/>
